DieselGas International Limited

Box 38 634

Wellington

New Zealand

Att. Mr. Harvey Reid

To whom it may concern,

Civic Corp is pleased to announce that we have completed the commissioning and testing of a Bus in Brazil using DieselGas technology for dual fuel operation.

The Bus uses the OM314 engine from Mercedes Bens and has been running in Brazil regularly since it was commissioned. It has passed all tests we have conducted with very good results. Particularly the drivability was considered virtually equal to diesel only operation mode and the substitution rate of Diesel per Natural Gas has reached up to 90% on peak and 75% on average on moderate urban traffic.

Civic Corp has presented the Bus in the EXPO GNV 2003 show in Rio Centro, Rio de Janeiro where it raised significant interest from the audience.

Kind regards

Civic Corp
