Mr. Harvey Reid
Managing Director
Diesel Gas
Wellington

21 April 1994

Dear Harvey:

***Re: Performance of Diesel Gas Kits on SSGC
Vehicles Fleet***

In response to your query on the performance of the Diesel Gas Kits on the sixty nine vehicles of Sui Southern Gas Company Limited. As we had informed you earlier, that our clients were quite apprehensive about the performance of dual fuel conversion kits, as there had been a fair amount of negative publicity generated against the conversion of diesel vehicles done previously by another Agency and which were facing a lot of operational problems for a number of reasons.

We are delighted to inform you that we have had no problems with the conversions that we have carried out with the Diesel Gas Kits. The customers are quite satisfied with the performance of the vehicles with these kits installed. We are in fact, using some of the Sui Southern Gas converted vehicles as demonstration vehicles for other potential clients and we are receiving quite a good response.

I must commend you on an excellent job done on the State of The Art Technology used on these kits yet the simplicity of installation and the computer programmes developed for monitoring the performance. We have been able to neutralise to a large extent the negative perceptions of diesel to gas conversions and we hope that we will be able to secure more orders in the future.

Please convey our very best regards to your talented team of a job well done.

Yours Sincerely

Muzahaj Ali Khan
Chairman
